PERSONAL SKİLLS

Leadership, Project manager, Organized,
Programmer, Team player, Fast learner

ABOUT

I plan to make a career in these fields by developing myself in the field of web programming and artificial intelligence programming. I see deep learning and fronted-backend software as the most suitable areas for me. I led the Google Developer Student Clubs Düzce University (GDSC Düzce) for 1 year. I am currently mentoring Tensorflow and Cloud at GDSC Turkey. I have developed projects in many hackathons so far. I developed a project in the autonomous vehicle category at Teknofest. My goal is to move forward with a company that follows technology.

WORK EXPERİENCE
